## Research Interests

My research lies at the intersection of machine learning and causal inference called *counterfactual learning*. I am interested in the counterfactual nature of logged bandit feedback obtained from interactive systems, and ways of using biased real-world datasets to assist better decision making.

## Involved Research Projects

- **Open Bandit Project** (<https://github.com/st-tech/zr-obp>)  
Open Bandit Project is an open-source research project that aims to enable the realistic and reproducible experiments on bandit algorithms and their off-policy evaluation. The projects consists of a large-scale real-world data called *Open Bandit Dataset* and a software called *Open Bandit Pipeline*.
